

Checklist for Birds of Mankwe Wildlife Reserve, North West Province, South Africa

A checklist of birds found at Mankwe was compiled by staff, researchers and visitors and consists of observations made over many years. However, this checklist is an on-going project with updates being made regularly as we make new observations and discoveries!

A. Status Codes			B. Residency Codes		
A	Abundant	Seen very often in most habitats	R	Resident	Resident breeder and is present year-round or exhibits local movement.
C	Common	Seen commonly at the reserve			
FC	Fairly Common	Seen often in some habitats or seen in low numbers in many habitats	S	Summer only	Migrant that is present in summer only
UC	Uncommon	Seen many times but not common	W	Winter only	Migrant that is present in winter only
R	Rare	Seen only once or twice	NO	Nomad	Movement is irregular and often tied to resources and environmental conditions
?	Uncertain	Presence or observations are uncertain or unknown			
VU	Vulnerable*	It is considered to be facing a high risk of extinction in the wild.	V	Vagrant	Species seen only once or twice and is not a summer or winter migrant
NT	Near Threatened*	Species is close to qualifying for a threatened category in the near future.			
* data is from the IUCN Red List of Threatened Species
